Is there an existing booster pump on site?	Yes / No
Is there an existing check valve on site?	Yes / No
Existing water meter size:	
<b>New water meter size:</b>	

**Required Physical Documents**

A Professional Engineer, licensed in the State of Maryland, must generate a brief certifying letter. The document must state what size meter reduction will be adequate for consumer’s needs, that it will be adequate for fire flow requirements, what kind of fire protection system is installed on the property, *if any*, and certifying that the reduced meter size meets all applicable City, State and Federal codes. The certifying letter must also state what was physically done, at the property, to make the determination. Any permits under the City Building, Fire and Related Codes, or approval to proceed under the City Commission for Historical and Architectural Preservation must be obtained, *if necessary*.

**Note:**

In some cases, a General Services permit may be required from the City’s Department of General Services before doing any utility work in the meter vault. If unsure, please call 410-396-4508.
